All about Apache Beam

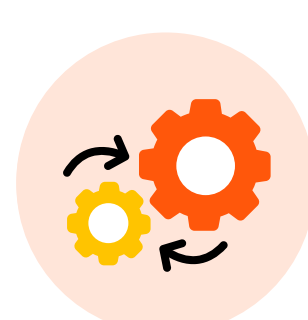

Unified

Use a single programming model for both batch and streaming use cases.

Extensive

Write and share new SDKs, IO connectors, and transformation libraries.

Portable

Execute pipelines on multiple execution environments.

Open Source

Use a single programming model for both batch and streaming use cases.

Check out our social media to learn more about the community!

How it works?

messages, databases, things from the list as icons

Sources

IO connectors + add list

Processing

Batch processing
Streaming

Do those 2 points require icons?

Sinks

IO connectors + add list

Write it in your language of choice - run it anywhere
