APACHE LOCAL COMMUNITY

- Local groups of Apache (Open Source) enthusiasts
- Similar to Java User Group, Google Developer Group, Facebook Developer Circles, Mozilla Reps
- Bring together local enthusiasts to meet and exchange knowledge, thoughts and ideas

APACHE LOCAL COMMUNITY
Indore Chapter

Agenda

- Open Source License
- Contributor License Agreement (CLA)
- Software Grant Agreement (SGA)
- Open Source opportunities
 - Internships
 - Jobs

What is Open Source License?

- Open source licenses are licenses that comply with the Open Source Definition — in brief, they allow software to be freely used, modified, and shared.
- Popular Licenses: Apache License 2.0, GNU General Public License (GPL), MIT license, Mozilla Public License 2.0

Copyleft Vs Permissive License

- Copyleft is the practice of granting the right to freely distribute and modify intellectual property with the requirement that the same rights be preserved in derivative works created from that property.
- Under a copyleft license, users must copy, distribute, and change the software under the same license as the original software while permissive licenses does not have such restriction to use the same license.
- Example: GNU (Copyleft) and Apache 2.0 (Permissive)

Copyleft Vs Permissive License

- Copyleft is the practice of granting the right to freely distribute and modify intellectual property with the requirement that the same rights be preserved in derivative works created from that property.
- Under a copyleft license, users must copy, distribute, and change the software under the same license as the original software while permissive licenses does not have such restriction to use the same license.
- Example: GNU (Copyleft) and Apache 2.0 (Permissive)

Contributor License Agreement (CLA)

- A Contributor License Agreement (CLA) defines the terms under which intellectual property has been contributed to a company/project, typically software under an open source license.

- At ASF we have:

ICLA: [Individual Contributor License Agreement](#)

CCLA: [Corporate Contributor License Agreement](#)

Software Grant Agreement (SGA)

- When an individual or corporation decides to donate a body of existing software or documentation to one of the Apache projects, they need to execute a formal [Software Grant Agreement \(SGA\)](#) with the ASF.
- Typically, this is done after negotiating approval with the ASF Incubator or one of the PMCs, since the ASF will not accept software unless there is a viable community available to support a collaborative project.

Open-Source Opportunities

- [Google Summer of Code program \(GSoC\)](#)
- [Google Season of Docs \(GSoD\)](#)
- [Outreachy](#) Internship
- [Open Source Immersion](#) by Facebook
- [Jobs](#)

Thank You For Your Attention
