CONFERENCE 2010

BUDAPEST • HUNGARY

Introduction

- Thorsten Bosbach
  - Working since 2001 at Sun Microsystems, now Oracle, in Hamburg
  - Developing and maintaining automated GUI tests
  - Taking care for Mac OS X platform
  - Managing the extensions and templates websites

Program

- What is drupal?
- History
- Extension website
- Template website
- Where can you help?
- What's next?
- Questions and answers

What is drupal?

Drupal ?

- Content Management System (CMS)
- Free software package
- Built-in functionality
- Add-on modules
- Extensible via API
- http://drupal.org

History

History

- Started with extension site at 01/2007
  - Started out of the community with 2 independent projects
    - One wanted to write from scratch
    - Alex Buchanan and Corey Shields from OSU OSL started with drupal
- Public release in 09/2007
- Hosted at the Oregon State University Open Source Lab
- Template site started at 11/2008
- Who submitted an extension?
- Who submitted a template?

Today

Extensions	Templates

MySQL Connector for OpenOffice.org
by Sun Microsystems, Inc.
Average: 5 (9 votes)
The MySQL Connector for OpenOffice.org installs a native MySQL database driver. It is faster, seamless integrated, easier to administrate and there is no need to install and setup a JDBC or ODBC driver separately. It was never easier to use MySQL databases in OpenOffice.org Base.
Version: 1.0.0 Date: 2009-Sep-10 License: Opensource

Sun Presenter Console

by Sun Microsystems, Inc.

Your rating: 5 (37 votes)

The Presenter Console Extension provides more control over your slide show presentation, such as the ability to see the upcoming slide, the slide notes, and a presentation timer whereas the audience see only the current slide.
To avoid confusions by displaying a large number of presentation elements, the Presenter Console displays the elements on three different easily changeable views.

Version: 1.0.3 **Date:** 2010-Feb-12 **License:** Opensource
Downloads: Today: 77 | Week: 847 | Month: 3719 | Year: 397263

Sun Presenter Console

by Sun Microsystems, Inc.

Rate this:

Average: 4.3 (36 votes)

The Presenter Console Extension provides more control over your slide show presentation, such as the ability to see the upcoming slide, the slide notes, and a presentation timer whereas the audience see only the current slide.
To avoid confusions by displaying a large number of presentation elements, the Presenter Console displays the elements on three different easily changeable views.

- The first view displays the current slide, including the effects and the upcoming slide
- The second view the speaker's notes in large, clear and scalable type plus the current and upcoming slide.
- and a slide sorter view with the slide thumbnails on the third view.

You will easily love this Extension it helps you to drive your presentation smoothly, especially the notes view which keeps you away from paper notes.

Please note that the Presenter Console works only on an operating system that supports multiple displays.

Compatible with: OpenOffice.org 3.0 | StarOffice 9

Sun Presenter Console 1.0.3-MacOSX

Thu, 02/11/2010 - 08:56 — mh

- 1.0.3, 2010-02-08: accessiblity enhancements, help included
- 1.0.2, 2009-06-04: allow switching the views via the keyboard, fixed bug 92574 ("enable switching the views if no additional display is enabled")
- 1.0.1, 2008-08-27: updated extension to OpenOffice.org 3 Beta 2 / OpenOffice.org 3.0 due to incompatible changes in the API. Stay with 1.0 if using OpenOffice.org 3 Beta 1.
- 1.0, 2008-07-11 : added extensions properties for better information in Extension Manager UI in OOo 3.0.
- 0.9, 2008-05-22 : Initial Release of the Sun Presenter Console

Do you know that many fine and cool extensions as this one, are available because of people like you ? Many enthusiastic users and developers around the world do some work for their favourite items in OpenOffice.org. They write an extension, or translate it, help with testing ... Read more for the presenter console extension here and for extension development in general.

Upload your template

For generating a valid template please consider the following points:

1. One template may be connected to just one language.
2. All strings in the following described fields have to be in that language.
3. Enter some content at OpenOffice.org -> File -> Properties... -> Tabpage 'Description'
    a. Title: Enter the title for your template.
    b. Subject: Enter a short description about your template.
    c. Keywords: Here you enter the keyword(s), which will be visible as tag(s) on the Template Repository site. Keywords need to be separated by comma.
    d. Comment: Here you can enter the provider name for the template.
4. Enter some content at OpenOffice.org -> File -> Properties... -> Tabpage 'Custom Properties'
    a. Rename an info field by entering the word 'License'.
    As value enter a html anchor link or just text.
    Example: BSD

    The result of this entries will be visible as
    License: BSD
    showing the link you have entered by mouse over the word BSD.

Now save your template as template and upload it.

What's next?

Todos

- Unify user accounts to matching OpenOffice.org names
  - For future single sign on feature
- Upgrade to new drupal version
  - Would give the chance for code cleanup and new features
  - Better performance for localisations
- Disable old abandoned content
- Enhance search criterias and result display
- Templatesite: offer a page just with the thumbnails of the templates?

Where can you help?

Help!

- Report inappropriate content
- Report website issues
- Contructive ideas for user interface improvements
- Translate website
