Moodle OpenMeetings plugin install

16-2-2012

The scenarie is:

Moodle 2.x
OpenMeetings 1.9.1 server
Plugin OpenMeetings: mod_openmeetings_moodle21_20111019.zip

1)
Having installed and launched OpenMeetings server.

Download OpenMeetings plugin for Moodle 2.x:

cd /opt

wget http://openmeetings.googlecode.com/files/mod_openmeetings_moodle21_20111019.zip

We copie it to (each one on his installation path ...blue color)

cp /opt/mod_openmeetings_moodle21_20111019.zip .../moodle/mod

...and unzipe (each one on his installation path ...blue color):

cd ..../moodle/mod

unzip mod_openmeetings_moodle21_20111019.zip

2)
We Moodle login as an administrator and us the indication that the OpenMeetings plugin must be installed.

To do this click the button labeled:

Upgrade

...tell us has installed successfully and then press the button:

Continue

Will show us a page with the connection settings to OpenMeetings server.

Let filling:

OpenMeetings Server Host or IP ....Host or IP where OpenMeetings server is installed.

OpenMeetings Server Port ..... 5080 ... so left.

Admin User OpenMeetings .... A user of OpenMeetings server that has administrator rights.

Admin User Password OpenMeetings .... The user's password before.

The rest we can leave it like this.

Press the button:

Save changes

3)
Let's Home and if we do a videoconference room to any particular course, click the link of the appropriate course and after press the button:

Turn editing on (top right)

Click on the bar:

Add an activity --> OpenMeetings

... and insert:

a)
Room nameRequired field .... Name that we will give the room.

Room type .... Type of conference we want.

Max users .... Maximum number of users in the room.

Room Language .... Language in the text of the room.

Modus moderation .... If you have to wait for the teacher or the first enter the room is moderated.

Allowed Recording .... If this is allowed or not video recording.

Comment .... Here you can write a review for the room.

Group mode .... Groups mode.

Visible .... Display of the link to the room.

ID number .... Number of construction for the room (1, 2, 3...)

Press the button:

Save and display

... take us to the room freshly made.

The link to the room appear on the selected course at the beginning and will have the name we gave to the room.

That is all.

If we want make the room out of any course:

1)

Turn editing on (at left) -> Add an activity - -> OpenMeetings

... and the rest from the step: 3 a)

To remove room links and OpenMeetings plugin:

1)
Turn editing on --> Go to room link and press x

After go to:

Site Administration --> Plugins -> to the right page shows the
plugins. Let:

OpenMeetings --> Uninstall --> Continue --> (Success) Continue

We will have to manually delete the folder (each one in his installation path):

.../moodle/mod/openmeetings

...because failure to do so when we go to the Home (Home) asked us to install
 the plugin again.

If you have questions, please expose it at the OpenMeetings lists in spanish or english:

http://incubator.apache.org/openmeetings/mail-lists.html

Thank you
