CommonsConvert

Convert Overview

{{ http://jakarta.apache.org/commons/sandbox/convert/images/convert-logo-white.png }}	Commons-convert Commons-Convert aims to provide a single library dedicated to the task of converting an object of one type to another. The first stage will focus on Object to String and String to Object conversions. A lot of information is available on the convert website. If you don't find the information you need you can always contact us using one of the mailing lists.

External Resources

Base on the ideas that have come out of work on Convert over the past year, MatthewSgarlata has created the Morph framework. The framework is still in pre-alpha, but there is Apache 2.0-licensed source available.
