Resources Component Page

This is the Wiki home page for the [Commons Resources](#) component. Resources is an alternative to the standard *java.util.ResourceBundle* for internationalization (i18n) of message resources.

This wiki contains the following resources 😊

- [Resources Class Diagram](#)
 - [User Guide](#)
-

Contribute to the Resources Wiki!

Tired of writing *resources* tips down on a piece of paper, or saving emails with code snippets? **DON'T !**

Keep your *resources* notes on the Resources Wiki, and get the benefit of other users experience and share your own. Never lose your notes when you change jobs, or are working at a remote site !
