- [Rejected Alternatives](#)

Status

Current state: *"Accepted"*

Discussion thread: [Dev-list](#)

JIRA: [KAFKA-12878](#)

Motivation

Almost all kafka tools uses `--bootstrap-server` parameter to specify server to connect to.

But `kafka-streams-application-reset` uses `--bootstrap-servers`.

It will be convenient for the user to use the same parameter in `kafka-streams-application-reset` as other tools do.

Public Interfaces

No new public interfaces will be introduced.

Proposed Changes

Add new command line paramter `--bootstrap-server` to `kafka-streams-application-reset`.

Compatibility, Deprecation, and Migration Plan

Deprecate `--bootstrap-servers`.

Test Plan

Test newly introduced parameter in the same way as existing was.

Rejected Alternatives
