

WebHCat

This is the manual for WebHCat, previously known as Templeton. WebHCat is the REST API for HCatalog, a table and storage management layer for Hadoop.

- [Using WebHCat](#)
- [Installation](#)
- [Configuration](#)
- [Reference](#)

See the [HCatalog Manual](#) for general HCatalog documentation. If you are looking for a Hive GUI instead of an API, see [Hive Web Interface](#) (removed in release 2.2.0).
