

Wiki access

Due to spam, the infrastructure team has restricted the access to all ASF Confluence open wikis (Confluence is shared by all ASF projects).

If you want to add or edit a page, comment or attachment, you need to sign up (create an account in Confluence) and be registered by the OFBiz team as a contributor.

If you have already signed up to Confluence, to register simply send your Confluence username (see in your profile) to the OFBiz user Mailing List: user@ofbiz.apache.org.

We will then register you as an [Apache OFBiz contributor](#). Of course you need first to be registered to the OFBiz user Mailing List, see <http://ofbiz.apache.org/mailling-lists.html>

Sandbox

If you are new to Confluence or want to try it without doing harm, you can safely use the [Sandbox](#) for it.
